

MONUMENT RESTRICTIONS

In keeping with the historical nature of the cemetery, and to assure all past and future lot holders that the cemetery will retain its historic feeling, Hingham Cemetery requires that all new headstones be consistent with the cemetery's historical integrity in size, shape, color, material, and decoration. Monuments must conform to the Hingham Cemetery guidelines below. The full Board of Directors *must review* a written, illustrated, detailed proposal for each monument before construction, and no monument may be installed without the Board's written approval. *There are no exceptions.* More ornate, oversized, or unusual monuments may be rejected at the discretion of the Directors. Hingham Cemetery reserves the right to remove (at the owners' expense) any monument or addition to an existing monument not previously approved by the Directors. For your protection, please contact the Superintendent before purchase.

SHAPE: Acceptable styles might include the following:

MATERIALS: Acceptable materials might include gray or white granite, slate, marble, or bronze. Unusual fabrication must be approved before manufacture.

VETERANS AREA: (See Veterans Area guidelines.)

ORNAMENTATION: Cemetery Directors must approve shape, size, materials, color, font, inscriptions and any decoration *before purchase* of the monument. Laser etchings, photographs, attachments, and/or tape recorders or digital discs or electrical items of any kind are prohibited on or near a monument. Memorials may be marked in foreign alphabets so long as all names and dates also appear in English on the monument. No coloration of any kind on the monument is allowed except black.
